

Kiran (0:00) No, I have nothing.

Speaker 3 (0:01) Ping.

Speaker 1 (0:03) Uh... I... Will see you just walk around for a bit and see.

Kiran (0:10) Okay, you can start.

Speaker 1 (0:17) Uh, okay, so since the last meeting, right, we say that I'll be. I'll be working on the review... Of the ability to review as a customer... As a resident. So I haven't done that since we were preparing for the testing and everything like that... But I was planning on doing it. Uh... Today later... And partly due tomorrow morning, so I did it done by... The afternoon or by... Midday. But yeah, that's all I will claim I'm claiming one thing.

Kiran (0:43) Okay...

Speaker 1 (0:49) I.

Kiran (0:52) For me... I'm finishing up my... The admin messages to review the messages. Then... Uh, I haven't started the other, uh, requests, the other user stories. I'm going to do them, I'm doing them right now... Actually. So... I'll have them finish before I go to bed. And other than that... I don't think I have anything else... Just that I'm... Working on it now.

Speaker 1 (1:30) Okay, I have also not started like I'm always just preparing for FLA but I will I will have it done by tomorrow's meeting. Yeah.

Kiran (1:43) Cool. Next.

Speaker 3 (1:46) Okay, so for me... Basically implemented... Like linked the... Priority level to... The number of likes. So I did that using. Or I to find the threshold by like the percentage of. I think the number of residents that are registered within that municipality. Because you know like if the certain area has... I don't know maybe like five people. So I can't like just hot cold like I don't know if it's the likes or. Less than 10 then... Then it's like a low priority if there's only five people in that whole area. So it's you... Yeah like a percentage...

Kiran (2:34) Makes sense.

Speaker 3 (2:34) Yeah... So I've done that there anything I haven't... But I haven't like fully tested it so I was just... Creating a new... All I've already created a new just like email address just... At least have to to see... That it's working like properly and then I haven't done the counter request it but I'll do that at the end... But so far it's looking like it's it's working. I just have to fully test it but that's all.

Kiran (3:07) Cool. Um... Next person, if there's anyone else... I think that's it for us.

Speaker 1 (3:21) There's no one else...

Kiran (3:24) Okay. Cool. So I guess that's it for today's meeting.

Speaker 1 (3:29) Yeah...

Kiran (3:30) Okay.

Speaker 3 (3:30) Yeah...

Kiran (3:32) Hey. Okay. Bye bye.

Speaker 3 (3:36) Bye... Guys...
