

Speaker 2 (0:00) Just come to the hall please.

Speaker (0:11) We can hear. There we can hear.

Speaker 3 (0:21) I'm doing research. You're still going to do the life changes... On the on the home page, right?

Speaker (0:29) The public dashboard. Yes, it's there. I sorted it out.

Speaker 1 (1:01) Yeah, we can.

Speaker (1:02) Yep.

Speaker 1 (1:15) Which part, which... Part like...

Speaker (1:20) That?

Speaker 1 (1:25) And it fetches real location.

Speaker 2 (1:27) It was more...

Speaker (1:29) Part.

Speaker 1 (1:31) And sure... The only problem that I... Recognize from his messages the one way... A user might be reporting something on the road. So they might not be at that same location. But that's something that... It's out of our scope for now. Because to edit, it's a lot of work. You can submit your data in account.

Speaker (2:01) You can...

Speaker 1 (2:04) Submit your data in account.

Speaker 3 (2:11) No, no, no, no.

Speaker 1 (2:12) You're not supposed to do that. No, you're not supposed to do that.

Speaker (2:24) No. No...

Speaker 1 (2:27) No, no, no. No, it's already mine. Because I think it's that part where you try to add or authenticate optional, but I kept removing. I didn't even put a or. Do you have a welcome. I just... A resident one. Bye.

Speaker 2 (3:30) What is that view? What?

Speaker 1 (3:33) How did you do... That? With you it like...

Speaker (3:41) That. Oh, oh. Okay.

Speaker 1 (3:51) I didn't know. I just know we had this but I...

Speaker (3:54) Sweet. And see, we can have a look at the pull request.

Speaker 1 (4:10) Oh wait, no... I missed... It. Did you remove it? Did you remove it in the actual database as well?

Speaker 2 (4:21) Because it might be work or ed or whatever.

Speaker (4:28) Maybe you see, you missed... It. Yeah, I mean... I understand. Hold on, just give me a sec. Okay.

Speaker 2 (5:41) Is that?

Speaker 1 (5:45) Can we open it? No, I'm just trying to see where it is.

Speaker 3 (5:54) What can you zoom in? That is like close to the taxi right? That's like you know where um... Bree is like... You know what I'm guessing...

Speaker 1 (6:11) You know what I'm guessing?

Speaker (6:14) Your cell phone's over. Yeah, I don't know.

Speaker 1 (6:27) Yeah, so I'm just going to explain. Is that the API is essentially using what's it called? Your... Your cell phone tower... Might be using your IP. And it's... Not hard code.

Speaker 2 (6:45) It's not tricky.

Speaker (6:46) Try to submit another... Request. And then you just... I will check the coordinates.

Speaker 1 (6:55) I'm also checking my family.

Speaker (6:57) As an I can check other people's requests and other one. Yeah.

Speaker 1 (7:03) To see if I'm... Going to login as a thing and check on my end... What mine gives me. I think it gives me the...

Speaker (7:13) Same. Thank you. I'll... Yeah.

Speaker 2 (7:24) What image, right? Anything is fine. Select... Submit.

Speaker 1 (7:32) Submit. What's that? What are your numbers?

Speaker (7:39) I'll see you this... Next.

Speaker 1 (7:47) I'd like to submit it maybe piano. My location is... So my longing to this 20.0.5. 83. I'm guessing that's...

Speaker (8:13) The same.

Speaker 1 (8:13) I'm guessing... That's the same.

Speaker 3 (8:14) Is it the same street?

Speaker 1 (8:17) I was just looking at the number that I was reporting on the site. But let me just check. Why is my resident dashboard loading? My resident dashboard... Is unloading.

Speaker 3 (8:45) It... Can be answered. Maybe it's a Wi-Fi because a Wi-Fi is trashier.

Speaker 2 (8:50) Imagine something like that. Just eye-parking.

Speaker (8:53) You just you guys should come to campus... Africa.

Speaker 3 (8:58) Please please we are...

Speaker (9:05) Fine here. Doesn't seem like you're fine. Here we trade Wi-Fi for electricity and water. Can I still?

Speaker 3 (9:14) No electricity we have.

Speaker 1 (9:18) So... We can switch to the geolocation API right because I have it implemented. It's still the up to the city people. J.S. Is just that when I was when I tried to use it before. It gave me an issue about something like permissions right. Can you go to the call. Yeah, so there's that section at the bottom of location where like they use an advocate and chill location API. We can try to comment that and then test how it works now but then. But reason I switched to this. IP was because it... Can issue where I link the stack to stack of floating there.

Speaker (10:29) Excuse...

Speaker 1 (10:37) Me. Yeah, it was giving me my end.

Speaker (10:43) Is...

Speaker 1 (10:43) It... Using Navigator?

Speaker (10:51) Pardon?

Speaker 1 (10:55) I just uncommented the geolocation on. Is it getting your actual location there?

Speaker 2 (11:11) That's it. Okay.

Speaker 1 (11:32) Ended shooting. Yeah, I'm doing it.

Speaker 2 (11:45) And I'll push in real quick. Yeah.

Speaker 1 (12:31) I did the...

Speaker (12:42) Reviewing. Yeah... Yeah.

Speaker 2 (12:49) Yeah. Yeah. Yeah. Because...

Speaker 1 (12:52) Reviewing a. And. Sorry, those show, those show under the as well and in the work of dashboard. It told you that...

Speaker (13:24) You need to close it first.

Speaker 1 (13:24) Well, now if it's not closed, it won't accept the review. It shouldn't... Accept.

Speaker 3 (13:27) Awesome. So what you're saying is like, I, if I'm a worker, I should like resolve the thing first and then someone reviews it.

Speaker 1 (13:35) Come on, needs to close it as... Well. It needs to be. I didn't see it. Can you say again? But. It won't show the... I know that it was in the back end. It won't show when you refreshed because it won't have registered in the back... End. My confusion would be both.

Speaker 2 (14:08) I...

Speaker 1 (14:13) Guess that's a... Bug in the front end.

Speaker (14:35) I think it's... My closure. It also has.

Speaker 1 (14:45) Okay, it was a recanting.

Speaker (14:48) But also the review shouldn't that not even like show... While there was... A list. It's still like. Yeah. Your once a status of this closed there.

Speaker 2 (15:05) And I just say...

Speaker 1 (15:08) Why did I put the button again?

Speaker 2 (15:13) For... Toggle, read back...

Speaker (15:17) Toggle...

Speaker 2 (15:21) Break status... Or the send just checks of like statuses.

Speaker 1 (15:24) Always put those testing closed...

Speaker (15:26) But...

Speaker 2 (15:27) Stated by closed.

Speaker 1 (15:40) I haven't... Didn't, I pushed, but I haven't pulled yet. I haven't been in a PR. For geolocation. Because... Did you uncomment that life? How did you do it? But in utility.js.

Speaker 2 (16:11) Yeah, I'm faster, but you say it leave...

Speaker (16:21) It. I did something similar for MCN. And I just use the geolocation.

Speaker 2 (16:31) I'm just testing it real quick.

Speaker 1 (16:34) I'm launching it locally first. Don't... For questions just write a little bit of your questions.

Speaker 2 (16:49) I'm just about to test the line. I'll give you the first time it does.

Speaker 1 (16:53) But you know what?

Speaker 2 (17:08) It's a great yeah, ready to...

Speaker (17:12) Go.

Speaker 2 (17:24) I must say that you're saying I'm not going to need...

Speaker 1 (17:29) It. What did you do where I'm confused?

Speaker 2 (17:46) It's interesting.

Speaker 1 (17:47) Okay, I got it through. I...

Speaker 2 (17:51) Think I think because it gives me what it's...

Speaker 1 (17:55) Giving me a different... One. I'm going to... Be.

Speaker (18:01) Thank you. It's...

Speaker 1 (18:06) Definitely completely, but let me just put it in... This thing I opened up...

Speaker 2 (18:11) One second.

Speaker (18:29) Thank you.

Speaker 2 (18:37) Let's get on it round about the right, why? To clip, hilarity...

Speaker (18:47) Okay. None to it.

Speaker 2 (18:47) Access Useivity The J use... And just make sure to go as well.

Speaker (19:29) Um.

Speaker 2 (20:02) Poe, I'm not happy I'd take any time to live that. I have to get pulled...

Speaker 1 (20:22) First. I mean... It's bitch.

Speaker (20:25) For...

Speaker 2 (20:28) I'm about to pee, I just don't know, merge it means first. Someone accept the PR. Someone just checked the PR so that they can accept. Wait, but first let me wait for the test next. Wait, wait, wait, wait, first, then don't actually accept... It.

Speaker 1 (21:49) Wait for the test first. While we find LinkedIn... And what is it for my team... Is in person. That would be some... As... You... Imagine that.

Speaker (22:12) And I just... Did it. Yeah, in team.

Speaker 1 (22:20) It's failing at the link and the...

Speaker 2 (22:24) Test.

Speaker 1 (22:29) The test one. On the test. All... Right, just check where code editor and then you can accept if it didn't if it only added utility j.js. Yeah... Right. Then you can accept. Yeah, because I'm guessing... Before it used an API. So the testing is probably using... Is more. It's essentially mocking the API though. So in this case, since I even moved the API... Thing, it wouldn't do.

Speaker (23:16) No, actually, I got a couple but then I need to write more and ask some of them a feeling. I don't know if I can stand what's going... On.

Speaker 2 (23:34) But this is going to need to be extended though... Because six.

Speaker 1 (23:42) Yeah I... Have get up opened. Just wait for the test real quick.

Speaker (23:55) Yeah.

Speaker 2 (24:24) I'm getting a little bit. To meet.

Speaker 1 (24:42) I've already done that. I was going to edit in the commit that I was thinking now... But then the test failed. So I'm just going to... Merge from the current main. And then after that... Yeah.

Speaker (25:56) We should also be so log in with... A different resistance of government. And then... Like you go in life... The... Same service... Request that's on the public dashboard. That the actual...

Speaker 3 (26:18) I can do the work one since I'm not... So. Okay, which one is it again? The electricity... With... Which electricity... Is the submissive.

Speaker (26:36) Let me just go.

Speaker 3 (26:39) Okay, I'm going to do the submission.

Speaker (26:41) Okay.

Speaker 3 (26:53) Okay, I'm gonna... Try and see... If...

Speaker (27:01) I can. Okay. Okay.

Speaker 1 (27:06) There is a redded test.

Speaker (27:09) Well.

Speaker 3 (27:10) Did you get my message. I got yours.

Speaker 2 (27:13) Asked. Yeah.

Speaker 3 (27:26) Yes. Yes. Yes. Yes. Off-committers while we're. Okay. I said it resolved.

Speaker (27:53) Okay.

Speaker 3 (27:55) Cool. Can you leave it if you know? Wait, so what does it mean like closed as in the admin should close it? Okay. Let's see. Let me try and log in.

Speaker (28:31) Yeah.

Speaker 3 (28:32) The closing is only for like... Other things. It should work when it's resolved. Also, I think that's a bit better. But let me close it and let's see. What was it you gain electricity?

Speaker (28:53) Mission. Okay, let me go.

Speaker 2 (28:58) Yeah. I guess.

Speaker 3 (29:00) Unfortunately, when I run my code, when it's resolved, I can't close it.

Speaker (29:08) Text... Closed.

Speaker 3 (29:11) Like, so the thing is already resolved. So there's no closed button anymore for it because there's no need to close it. Do you get one thing? So now there's

like a click now. Maybe Sam, can you change it to instead of closed, it's being like resolved.

Speaker 2 (29:37) For what?

Speaker 3 (29:39) For the reviews.

Speaker 1 (29:41) For the review.

Speaker (29:43) Yeah.

Speaker 3 (29:44) Because now like the the requests that are... Resolved, I can't... Close them.

Speaker 2 (29:53) I'm confused.

Speaker 3 (29:56) Look... There's a difference between closing and resolving... Right? Yeah. But now... We can only submit reviews when... It's closed.

Speaker (30:08) Yeah.

Speaker 3 (30:10) But now if something has already been resolved... Then I can't close it anymore because it's done. That's how I wrote the code.

Speaker (30:20) Oh.

Speaker 3 (30:21) So there's no closed button anymore for me to close it. I can only close it if it's like everything else except resolved.

Speaker 1 (30:28) Yeah.

Speaker (30:30) I will.

Speaker 2 (30:32) Resolved.

Speaker 1 (30:45) Who did the feedback testing?

Speaker (30:52) For...

Speaker 1 (30:54) Feedback. There's testing here... For feedback.

Speaker 2 (30:58) It's feedback successfully with all... Of what happens...

Speaker 3 (31:02) Then. Is that some?

Speaker 2 (31:04) In... What is...

Speaker 1 (31:07) It's resident dashboard test?

Speaker (31:10) I have a question. Can like can two workers claim the same issue? God, I'm saying.

Speaker 1 (31:23) Why did?

Speaker 3 (31:24) Can you?

Speaker (31:26) Yeah. Why am I chatting with them? Is there a different thing? Is it this? Is it the same user store?

Speaker 3 (31:35) It's a different one.

Speaker (31:37) Oh, you see, I got a roll of my mic.

Speaker 2 (31:56) I'm confused where this is.

Speaker 1 (32:19) Yeah, I did the feedback form. The right review is feedback.

Speaker (32:30) Hello.

Speaker 1 (32:37) You is feedback. Yeah, that's in the same way with... The English.

Speaker 2 (32:57) So with the cheers.

Speaker 1 (33:13) Why would back end display review?

Speaker 2 (33:20) There is.

Speaker 1 (33:21) It's just not... Closed.

Speaker (33:30) But...

Speaker 1 (33:32) Is that closed? Is that closed? But it yeah, it's in resident dashboard... And worker dashboard, but that closed. You won't see this.

Speaker (33:44) Yeah.

Speaker 1 (33:47) These tests. I'm gonna go.

Speaker (34:02) So.

Speaker 2 (34:02) We'll go. Um. Teet back for.

Speaker (34:11) The dem...

Speaker 1 (34:12) Back talk off... And I'm also going to also... Say say i should just make it into what you call it... Into result... Into result result right... You have to submit to the submit review... Please rush cos you're not using web sockets. The refresh...

Speaker (35:04) The... Resident dashboard.

Speaker 1 (35:07) Whoever the resident is but didn't use web sockets or the listeners... For firepays so it's not going to show up immediately... After refresh.

Speaker 3 (35:22) Kiran, can you please go to electricity? I, the one with the green... Because I, oh, I changed the priority. I wanted to see if it works. Okay, the priority works. Cool. Cool.

Speaker 2 (35:45) Extension... Of this. This time, this time.

Speaker 1 (35:51) I'm doing it now. But then... Whoever did... This for feedback though, I don't know where the problem is. Because I don't even... Do. I did not just move it. It's fine. I don't know where this error... Is. I don't even want to. Let me just push it and then you will just get it. Yes, just check, fix, feature... If it's something I have.

Speaker 2 (36:49) Fix... Feedback... For... I... Resolved.

Speaker 1 (36:58) To... Push. And I'm still pushing.

Speaker 2 (37:13) Still pushing.

Speaker 1 (37:14) So if you're checking something out right now, it's probably not it. Because I just pushed something. It's too push. Yeah, it push now. So you can check that test. There's a.

Speaker (38:00) Lee Phillips.

Speaker 2 (38:04) I... Think. Um. What do...

Speaker 1 (38:30) You mean it's there but... That's... It's there.

Speaker 2 (38:37) It's. I was not going to. I'm going to go back... And pick. Dash forward.

Speaker 1 (38:43) Uh, uh, we was taking.

Speaker 2 (38:51) The status closed.

Speaker 1 (38:53) Will those status closed just search for. Direct comment. Just check the thing you first is all... The tests. Because I put... Correct.com... And. Yes.com... And. In resident dashboard. That's for showing. I'm not sure what... The. The problem in that test case is. Because that's just AI... Test tonight. No, it's in the service... Request. So ever request request will have that review in that request. Don't just have to use it.

Speaker (39:57) Get.

Speaker 1 (40:02) It's in the service request collection. So whatever document that request is, there's going to be a field for comment and rating if someone has already written a review and comment.

Speaker (40:13) Review. Yeah.

Speaker 1 (40:23) But... Done it, so I'm just going to quickly... Run it locally and see if it works. Trust me to do what it's already done. It's just those tests. Yeah, but I didn't remove those tests because you say you wanted to check and do them... And fix them. Yeah... I was just going to delete them, but you wanted to. That's... Feature... Effects.

Speaker (41:01) They are feature effects.

Speaker 2 (41:02) Make... Sure we fix. And just check if the button hides where.

Speaker (41:26) Yeah...

Speaker 1 (41:29) It's only therefore it's therefore resolved.

Speaker (41:33) Yeah.

Speaker 2 (41:37) And just see... If.
